

How a teardrop-shape reached world fame... so beautiful as to weep.

Our late co-founder Mr. Herbert Nickerl enthused about this car as a "century event on wheels". And he was right, the numerous international awards and prizes this Teardrop-Coupé won in the meantime is unrivalled in the history of automobiles.

For many experts and car enthusiasts it simply is the most beautiful car that have ever been seen. A rolling automobile-legend where lines, curves and shapes are fascinating and contribute significantly to the aesthetic overall design of the teardrop shape. Its spiritual father, Joseph Figoni was considered as one of the most brilliant coachbuilder of all times.

With the Talbot Lago Type 150 C-SS he set himself an enduring monument and for the Art-deco era a fascinating role model.

CMC presents this automotive-legend in different color variations as a highly detailed precision metal model is scale 1:18. Discover model-building-art which matches the perfection of the original.
