LATEST RELEASES FROM THE WORLD OF MODEL CARS

1:18 MASERATI 250F

Elsewhere in this issue you can read about Nick Mason's Maserati 250F, as Mark Hales takes it around the Donington GP circuit. The maker of this superb replica, CMC, is renowned for the quality of its 1:18 subjects and this astounding model is handbuilt from over 1400 separate parts. At £149.99 it's not cheap but the price represents good value for such an impressive level of detail.

Model
of the month

1:18 AND 1:5 FERRARI F430 MODENAS

There's a world of difference between these two replicas: the version with closed doors is modelled in 1:5 scale by Amalgam and costs £2750, while the model with doors, boot and bonnet open is by Mattel in the more popular 1:18 scale and costs just £24.99.

1:18 BENTLEY CONTINENTAL GT

There's no doubting the popularity of the new Bentley but at £115,000 it will be out of reach for most. This new Minichamps replica costs a more affordable £54.99 and detail is first-class.

1:28 SPITFIRE VB

Hand-carved in wood to 1:28 scale, and with no fewer than 35 coats of paint, this 19in wingspan Spitfire is signed by its illustrious pilot, Neville Duke, and limited to just 100 pieces. £149.99.

1:18 ASTON V8 VANTAGE

Mattel worked closely with the Aston factory to launch its model at the same time as the real car. This version is yellow, like the Motor Show car; grey and green versions will follow. £24.99.

1:18 MASERATI MC12

Maserati is only building 50 examples of the MC12 to qualify for the FIA GT Championship race series. This new replica from Mattel features an impressive level of detail for just £24.99.

1:12 MOTO GUZZI LE MANS

Due to arrive in the UK any day now, a beautifully crafted and very detailed Paul's Model Art replica of the original 850cc, vee-twin Moto Guzzi 'bad boy'. Cost is £59.99.
